

Computational Interaction Science Reading Guide

Prioritized orientation to the project literature

Tier 1 - Foundational

- Hutchins, E. (1995). *Cognition in the Wild*. MIT Press.
- Card, S. K., Moran, T. P., & Newell, A. (1983). *The Psychology of Human-Computer Interaction*. Erlbaum.
- Gibson, J. J. (1979). *The Ecological Approach to Visual Perception*. Houghton Mifflin.
- Milner, R. (1989). *Communication and concurrency*. Prentice Hall.
- Suchman, L. A. (1987). *Plans and Situated Actions*. Cambridge University Press.
- Sutton, R. S., & Barto, A. G. (2018). *Reinforcement Learning: An Introduction* (2nd ed.). MIT Press.
- Kaelbling, L. P., Littman, M. L., & Cassandra, A. R. (1998). Planning and acting in partially observable stochastic domains. *Artificial Intelligence*, 101, 99-134.
- Shannon, C. E. (1948). A mathematical theory of communication. *Bell System Technical Journal*, 27, 379-423, 623-656.
- Sutton, R. S., Precup, D., & Singh, S. (1999). Between MDPs and semi-MDPs: A framework for temporal abstraction in reinforcement learning. *Artificial Intelligence*, 112, 181-211.
- Ashby, W. R. (1956). *An introduction to cybernetics*. Chapman & Hall.
- Baier, C., & Katoen, J.-P. (2008). *Principles of Model Checking*. MIT Press.
- Card, S. K., Moran, T. P., & Newell, A. (1983). *The psychology of human-computer interaction*. Lawrence Erlbaum Associates.
- Card, S. K., Moran, T. P., & Newell, A. (1983). *The Psychology of Human-Computer Interaction*. Lawrence Erlbaum.
- Chemero, A. (2009). *Radical embodied cognitive science*. MIT Press.
- Clark, A., & Chalmers, D. (1998). The extended mind. *Analysis*, 58(1), 7-19.
- Clark, H. H. (1996). *Using language*. Cambridge University Press.
- Cleveland, W. S., & McGill, R. (1984). Graphical perception: Theory, experimentation, and application to the development of graphical methods. *Journal of the American Statistical Association*, 79(387), 531-554.
- Daston, L., & Galison, P. (2007). *Objectivity*. Zone Books.
- Dourish, P. (2001). *Where the Action Is: The Foundations of Embodied Interaction*. MIT Press.
- Dretske, F. I. (1981). *Knowledge and the Flow of Information*. MIT Press.
- Engestrom, Y. (1987). *Learning by Expanding*. Orienta-Konsultit.
- Engeström, Y. (1987). *Learning by expanding: An activity-theoretical approach to developmental research*. Orienta-Konsultit.
- Fikes, R. E., & Nilsson, N. J. (1971). STRIPS: A new approach to the application of theorem proving to problem solving. *Artificial Intelligence*, 2, 189-208.
- Giere, R. N. (2006). *Scientific perspectivism*. University of Chicago Press.
- Hoare, C. A. R. (1985). *Communicating Sequential Processes*. Prentice Hall.
- Hollnagel, E., & Woods, D. D. (2005). *Joint cognitive systems: Foundations of cognitive systems engineering*. CRC Press.
- Hornbæk, K., Mottelson, A., Knibbe, J., & Vogel, D. (2019). What do we mean by “interaction”? An analysis of 35 years of CHI. *ACM Transactions on Computer-Human Interaction*, 26(4), Article 27. <https://doi.org/10.1145/3325285>
- ISO 9241-11:2018. *Ergonomics of human-system interaction - Usability: Definitions and concepts*.
- Kaptelinin, V., & Nardi, B. A. (2006). *Acting with technology: Activity theory and interaction design*. MIT Press.
- Marr, D. (1982). *Vision*. W. H. Freeman.

Tier 2 - Core Supporting

- Milner, R. (1980). *A Calculus of Communicating Systems*. Springer.
- Newell, A., & Card, S. K. (1985). The prospects for psychological science in human-computer interaction. *Human-Computer Interaction*, 1(3), 209-242.
