

Canonical Figure Index

Version 1.0.0-integration.1

16 indexed records. The CSV/XLSX file is authoritative for machine processing.

Paper ID	Paper	Figure/Caption	Embedded Media Count	Table Count	Source DOCX
01	INTERACTION AS A SCIENTIFIC EXPLANANDUM	Figure 1. Dependency graph for the minimum ontology. Arrows indicate explanatory dependence, not necessarily temporal precedence.	1	8	02_Research_Papers/01_Scientific_Explanandum/Interaction_as_a_Scientific_Explanandum.docx
02	CAN INTERACTION BECOME A PRIMARY SCIENTIFIC OBJECT?	Table 1 compares scientific structure rather than disciplinary history. "Observer" identifies the investigator or measurement system; "observed" identifies the focal target. The rows are ideal types: each discipline contains internal disagreement and	0	5	02_Research_Papers/02_Primary_Scientific_Object/Can_Interaction_Become_a_Primary_Scientific_Object.docx
03	How Sciences Define Their Objects	Table 1 records dominant structures rather than exhaustive internal diversity. 'Observer' identifies the epistemic role that selects and records evidence, not necessarily a person external to the system. 'Mechanism/dependency' includes lawful, causal	0	6	02_Research_Papers/03_Architecture_of_Sciences/How_Sciences_Define_Their_Objects.docx
04	Representation, Invariance, and Projection	No explicit caption detected	0	6	02_Research_Papers/04_Representation_and_Projection/Representation_Invariance_and_Projection.docx
05	Ontology, Semantics, Representation, and Interpretation	Table 7 is the reusable transformation matrix. Its rule is that invariance must be typed and tested independently for ontology, formal semantics, information, representation,	0	9	02_Research_Papers/05_Ontology_Semantics_Interpretation/Ontology_Semantics_Representation_and_Interpretation.docx

		interpretation, and behavior.			
06	Opportunity, Affordance, and Action Availability	No explicit caption detected	0	3	02_Research_Papers/06_Opportunity/Affordance_and_Action_Availability.docx
