

Canonical Vocabulary

Version 1.0.0-integration.1

54 canonical records. The CSV/XLSX versions are the machine-readable systems of record.

canonical_id	term	maturity	observable_status	latent_status	measurement_status	originating_paper
domain-commitments	Domain commitments	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Ontology, Semantics, Representation, and Interpretation
system-state	System state	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
semantic-assignment	Semantic assignment	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Ontology, Semantics, Representation, and Interpretation
semantic-state	Semantic state	Proposed	No - latent/inferred	Yes	Requires latent-variable model	Ontology, Semantics, Representation, and Interpretation
information	Information	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Ontology, Semantics, Representation, and Interpretation
representation	Representation	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Representation, Invariance, and Projection
projection	Projection	Proposed analytical role	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
scoped-invariance	Scoped invariance	Proposed theory	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Canonical glossary
interpretation	Interpretation	Proposed	No - latent/inferred	Yes	Requires latent-variable model	Ontology, Semantics, Representation, and Interpretation
interaction-participant	Interaction participant	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Canonical glossary
agent	Agent	Proposed subtype	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
environment	Environment	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Behavior
affordance	Affordance	Established external construct	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
opportunity	Opportunity	Proposed coordination framework	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
opportunity-profile	Opportunity profile	Proposed	Conditional on observation	No or not inherently	Operationalizable by contract	Representation, Invariance,

			model			and Projection
capability	Capability	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
permission	Permission	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
enablement	Enablement	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
reachability	Reachability	Proposed	Conditional on observation model	No or not inherently	Operationalizable by contract	Opportunity, Affordance, and Action Availability
exposure	Exposure	Proposed	Conditional on observation model	No or not inherently	Operationalizable by contract	Opportunity, Affordance, and Action Availability
signaling	Signaling	Proposed	Conditional on observation model	No or not inherently	Operationalizable by contract	Opportunity, Affordance, and Action Availability
discoverability	Discoverability	Proposed	Conditional on observation model	No or not inherently	Operationalizable by contract	Opportunity, Affordance, and Action Availability
believed-action	Believed action	Proposed latent variable	No - latent/inferred	Yes	Requires latent-variable model	Opportunity, Affordance, and Action Availability
action	Action	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Opportunity, Affordance, and Action Availability
state-transition	State transition	Proposed	Directly/ Instrumentally	No or not inherently	Measure only under declared operationalization	Interaction
observation	Observation	Proposed	Directly/ Instrumentally	No or not inherently	Measure only under declared operationalization	Formal Models of Computational Interaction
situated-behavior	Situated behavior	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Canonical glossary
behavioral-evidence	Behavioral evidence	Candidate	Directly/ Instrumentally	No or not inherently	Measure only under declared operationalization	Behavior
behavioral-equivalence	Behavioral equivalence	Candidate	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Representation , Invariance, and Projection
interactional-equivalence	Interactional equivalence	Candidate	Conditional on observation model	No or not inherently	Measure only under declared operationalization	INTERACTION AS A SCIENTIFIC EXPLANANDUM
interaction	Interaction	Proposed scientific target	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction

interaction-episode	Interaction episode	Proposed canonical unit	Conditional on observation model	No or not inherently	Operationalizable by contract	Interaction
coupling	Coupling	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction
perturbation	Perturbation	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction
uptake	Uptake	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction
recurrence	Recurrence	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction
interaction-contract	Interaction contract	Proposed reusable artifact	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction
interaction-morphology	Interaction morphology	Candidate	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Canonical glossary
interaction-grammar	Interaction grammar	Candidate	Conditional on observation model	No or not inherently	Measure only under declared operationalization	CAN INTERACTION BECOME A PRIMARY SCIENTIFIC OBJECT?
interaction-history	Interaction history	Candidate	Conditional on observation model	No or not inherently	Measure only under declared operationalization	INTERACTION AS A SCIENTIFIC EXPLANANDUM
trace	Trace	Proposed	Directly/Instrumentally	No or not inherently	Operationalizable by contract	Interaction Similarity
measurement-contract	Measurement contract	Proposed reusable artifact	Conditional on observation model	No or not inherently	Operationalizable by contract	Measurement
interaction-similarity	Interaction similarity	Proposed typed comparison framework	Conditional on observation model	No or not inherently	Operationalizable by contract	INTERACTION AS A SCIENTIFIC EXPLANANDUM
token-identity	Token identity	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction
type-identity	Type identity	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction Similarity
equivalence	Equivalence	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction Similarity
similarity	Similarity	Proposed	Conditional on observation model	No or not inherently	Measure only under declared operationalization	Interaction Similarity
incomparability	Incomparability	Proposed	Conditional on observation	No or not inherently	Measure only under declared	Comparative Interaction

			model		operationalizati on	
similarity- contract	Similarity contract	Proposed reusable artifact	Conditional on observation model	No or not inherently	Measure only under declared operationalizati on	Interaction Similarity
strategy	Strategy	Proposed latent explanatory construct	No - latent/inferred	Yes	Requires latent-variable model	Interaction Strategies
strategy- contract	Strategy contract	Proposed reusable artifact	Conditional on observation model	No or not inherently	Measure only under declared operationalizati on	Interaction Strategies
policy	Policy	Proposed	No - latent/inferred	Yes	Requires latent-variable model	Interaction Strategies
fundamental	Fundamental	Proposed research substrate	Conditional on observation model	No or not inherently	Measure only under declared operationalizati on	CAN INTERACTION BECOME A PRIMARY SCIENTIFIC OBJECT?
computational- interaction- science	Computational Interaction Science	Proposed research program; disciplinary autonomy unproven	Conditional on observation model	No or not inherently	Measure only under declared operationalizati on	Computational Interaction Science
