

Publication Readiness Assessment

Determination

Publication infrastructure is editorially normalized for controlled Version 1.0 use, subject to bibliographic authority validation, figure completion, and final publication assembly.

Passed

Terminology presentation, canonical contract capitalization, Markdown structure, heading syntax, style policy, release labeling, and derivative-document styling.

Not evaluated

Normative theory, full Knowledge System of Record consistency, complete research-paper hierarchy, bibliographic authority, and empirical validity.

Next gate

Run bibliographic verification, then perform the final publication copyedit on the complete assembled corpus.
