

Publication Readiness Assessment

Version 1.0.0-integration.1

Assessment

Assessment: Publication ready only as a reconciled release candidate, not yet as a ratified normative standard.

Strengths: coherent authority structure; 54 normalized concepts; 42 declared relations; 16 research papers indexed; complete artifact hashing and provenance paths.

Blocking items: provisional status of ontology/glossary; incomplete normalized Comparison Contract; uneven reference metadata; absence of ratified empirical validation for Proposed constructs; figure governance gaps.

Readiness estimate: 78/100. This score reflects corpus completeness and internal coherence, not empirical validation of the theory.

Required next gate

Complete and ratify the formal specification, bibliography metadata audit, experimental handbook, and final consistency audit.
